## Ansel Adams In Hospital

Famed nature photographer Ansel Adams entered Presbyterian Hospital in San Francisco yesterday for open heart surgery today.

The 76-year-old Carmel area resident announced he had been dieting seven months to prepare for the operation — the implanting of a heart valve — and said he was "happy and unworried."

Dear Laura.

Thought this would interest you. It must have been hard for Ansel to diet for seven months with Virginia's good cooking!

I have your lovely Christmas photo card here on my desk. It reminds me of you very often.

Love from Ned and me, Mary
