

LAURA

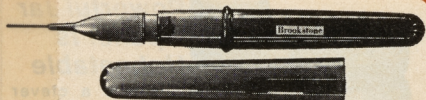

AT THE INSTANCE OF BOTH
D. AND C. J.

THE BIRTHDAY MOUSE IS
COMING YOUR WAY

BELATEDLY TO CELEBRATE
THIS DAY

WITH A SURPRISE

Precision Clock Oiler Is Unique (And LeakProof!)

You can buy oilers for as little as 75¢ or so, but not this fine Swiss quality.

In this clever patented design, the needle-like tip is the oil tube, not a plunger wire that has to be pushed in before oil comes out. This feature lets you place oil exactly where you want it. Tube is rustproof stainless steel, has .019" dia. hole.

Also, oil comes out under mild pressure, not just gravity. This enables oiling hard-to-reach places, even overhead. Delivers in proportion to hand pressure.

Another exclusive feature: When you release pressure, excess oil is sucked back automatically into transparent reservoir, giving you exact control to the tiny fraction of a drop.

Use any oil, from light watch oil to heavy motor oil. Easy to clean and fill. Ample capacity. Leak-proof. Rust-proof. Cap keeps tip clean, parks on back during use. Perfect for clocks, instruments, business machines, all other precise oiling. About 6" long.

Supplied in up to 5 colors, for contents identification, when more than one is ordered.
