

409 Camino del Monte Sol

Sept. 22.
1967

Mr. Adolph Gasser,
San Francisco,
California

Dear Mr. Gasser:-

Enclosed please find my check for \$15.00 for the repair work on my Medalist No. 1 camera. I haven't had an opportunity to try it out yet, but will do so shortly.

Under separate cover I am sending you my No. 2 Medalist. There are two things wrong. Recently I shot a roll of film with it using a cable release as I usually do. I had four good exposures, and four blanks. This has happened twice. In working both shutters with the camera back open, they seem to work O.K., Will you please give this a thorough check. Then there seems to be some trouble with the flash sync. If a bulb is put in before cocking the shutter it will flash when the shutter is cocked. If the shutter is cocked first and the bulb put in after it seems to be O.K. There must be some kind of short. And will you please check the plate back to this camera also, as well as the depth of field scale.

Thank you very much

Very truly yours,

P.S. Please note that I am now getting my mail at my residence. Will have some new stationery shortly.
