Not recorded at a high enough sound level.

Title

LAURA not LARA GILPIN

156 — "When I decided to go in phony."

This Kaiser's incident is the marking place, in my opinion — the preceding should be put in later.

239 — Everbody's foreground not leading into eye into the visual center.

Wrong lens used — too short focal.

Recording level + light up change — improved.

345 — Summary of White's influence

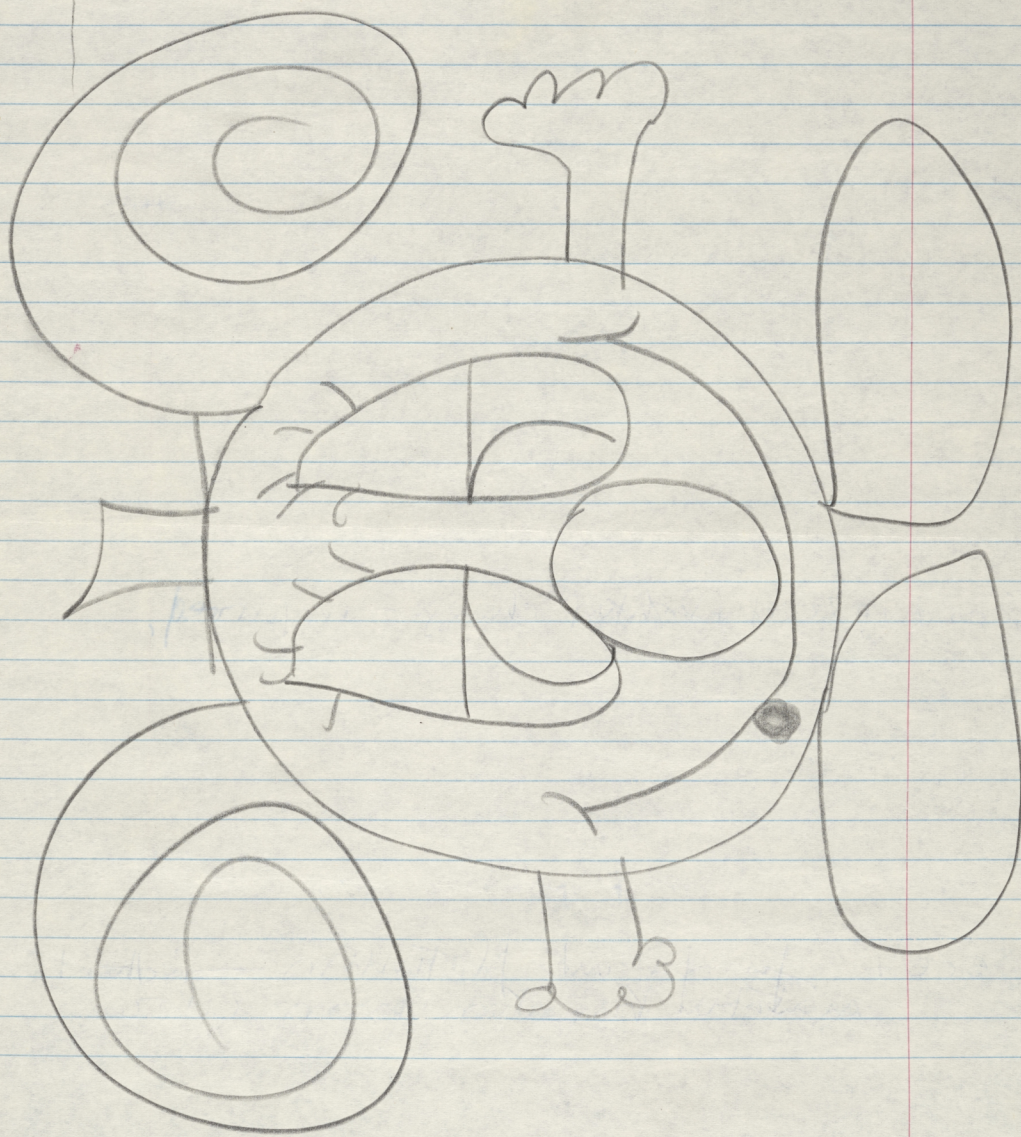

light change

Tone level higher + better (in level).

380 — Atm Beach — first advertisement in color

Background music ~~interference~~ interference (!)

500+ jumps into platinum — instant
subtler transition from color.
