Weaving legend.

Spider Man & Spider Woman taught the
Navaho to weave. Spider man drew some

The Spindle disks.
went from his side & instructed the Navaho to make
a loom. The upper cross pole was called the sky -
the lower pole - the earth. The warp sticks were
made of sun rays. The upper strings holding
the warp were made of lightning. The lower strings
the sun's halo. The batten was also made
of the sun's halo & the comb was of white shell.
There were 4 Spindles. The spindle disks were
made of ⁱⁿcamel coals, turquoise, abalone, & white bead.
The colored winds quivered the Spindles according
to their color.

Then the legend the weaver must ~~avoid~~ over
weave with moderation. Overdone weaving requires
a sacrifice offered to the Spindle. In the old tradition
girls did not weave before marriage for fear of over
doing.

Shelburne

Rail Roping & Ship Fair

Galloping Horses. W.R.

Other W.R. Fair Pix.

In 1909, Agricultural Agent Wm T. Shelton instigated
a fair at Shiprock for the benefit of the Northern Navaho area.
Mr Shelton did much to ~~promote~~^{encourage} fine weaving through this
fair, promoting fine displays of rugs. For a while the Shiprock
fair was discontinued to be resumed in 1937 with
increased emphasis on weaving, ~~and~~ agricultural exhibits,
and livestock exhibits, for Mr Shelton did much to
improve the quality of Navaho sheep ^{and consequently wool} in this northern area.
