

July 16, 65

Dr. Charles McCamman,
U.S. Public Health Service,
Window Rock, Arizona.

Dear Dr. McCamman:-

I have just been at Window Rock to obtain the final check and some final information for a photographic book on the Navaho on which I have been working for many years. I am, ofcourse, including a portrait of Annie Wauneka whom I have known for years, and I need specific information for a short biography to go with this picture, perhaps 500 words. I saw Annie three days ago and she wanted me to ask you for this material, she seemed very reluctant to talk about herself, in addition to being busy with committee meetings.

I had so many people to see and things to do that time ran out on me. I wanted to show you the dummy of my book which I had with me. I just didnt quite get everything done, and I had to be back in Santa Fe, yesterday.

What I need is a brief outline of Annie's accomplishments in the health program. I know in general but ddo not have specifit information. I do not want to bother you more than I can help, but I would appreciate a list or short statement of the highlights of her work. She asked me to see you, and I regret that it was after hours Tuesday aftnoon when I got back to headquarters. Ned Hatathli wanted me to go up to Navajo to see the new sawmill and Maurice McCabe insisted on seeing that I was taken through the new law and order building.

I will be very grateful for any information you can send me. I am approaching my final deadline and do not have much time left.

Most sincerely yours,
