Dear Laura,

I have done nothing more about the gasoline situation except dictate the letter I told you I would write to Ellis Bauer at the Santa Fe ration board. From your letter, I gather you don't need anything more, but would like another letter from us stating that we have contracted with you to do a book.

By the way, what is the name of the soil conservation book you mentioned? I wrote to Washington inquiring about it, and the Department of Agriculture reported that no book had been published on this subject nor was any contemplated. I would be very much interested to see this book and would very much appreciate knowing the title.

Best of luck!

Sincerely,

Walter
