TEMPLES IN YUCATAN

A Camera Chronicle of Chichén Itzá

By

LAURA GILPIN

Throughout southern Mexico and northern Central America the ruins of many astonishing temples have been found, relics of the once great civilization of the Maya. Thanks to the skill of the modern archaeologist, some of these ruins have been repaired and reconstructed. One such group is the city of Chichén Itzá in central Yucatan, Mexico, an outstanding example, which has now become easy of access through the development of the inter-American airways.

Laura Gilpin's brilliant camera study of Chichén Itzá conveys the grandeur of its buildings in all their beauty of proportion, spacing and ornamentation. The 117 striking photographs include, in detail, the most important temples and other structures, as well as afford intimate glimpses into the life of the present-day Maya. A brief but highly informative text accompanies the pictures.
