(note to Ed.) This page evidently is also
 one I re-copied. I have a carbon with pencil
 addition at bottom of page. I presume that
 you are refering to Itzamma.

(Note to Ed.) My copy of page 3 is not a carbon but the page made by typist on which I made some final changes. I trust that the lines are the same, but in any event every word on the page which should have an accent is repeated here. Uxmal is an exception and has no accent.

Page 11. Line 4- Cordova
line 24 Chichen Itza.

(Note to Ed.) the names Grifalva and Montejo are not accented and follow regular Spanish accent of the next to the last syl.)
