

Jan 16th

It seems foolish to write you again after talking to you but it is sort of saying good night + can become a habit which I hope you won't mind dear.

It doesn't take the place of your head on my shoulder or that sense of comfort that comes from contact and holding hands.

I suppose the emotional can be reduced to current transmission but I would leave it with souls.

I am not far away alone here with you. Some Chilean singers with guitars are on the radio with soft voices and I realize what I miss following the youth habit of doing two things at once.

Have had a lovely concert tonite. Stock exchange + then another later - Interrupted by Mrs Joe Cox calling Kay. - not snowed it but pleasant yarn.

All bills paid + hope to see day light + next week work on sorting myself out + having the dream child - a place for everything etc. Nellie + Mack to the lake. + paper says more snow.

Are reaching maturity I think wanted to talk to Donald. Head

and she asked to Chem Club. &
then revoked & brought here to eat the
last of the mutton -

A nice lad 30. - a Capt in marines
Pacific Islands - Z. V. Williams. Starting
at bottles with G. but going up.

A lad I would instinctively trust
Marie Boy 15 yrs. old. wife Boston
efficient - Stephanie - acct no Stephen
would come in family

I go out with O'Brien on 10²⁰
and talk place & look at his mother
and chest twins.

I may invite him to come
over for a month or two with freedom
to go back at any time

It would mean Sandy being
#2 man + living either at Dorset
or with Tor. It is only logical
if I feel he would make for value
received a man I could rely on
for many small things. Some
intangible.

It is not fair I should burden you
with all this & I apologise but I know
it would relieve you to feel that
Sandy was not dominant at
C.B. If this is done and
OB going smoothly I could leave

#2

One sheet should be the maximum but tomorrow I shall be at W. & then take G.H. to Explorers club.

I took a nap tonight before dinner and think I can make a habit of it. It is funny also how contented I am to sit at my desk here and read & make notes of things & then haulle on the phone.

We shall have to get transportation reservations at once & may have to take passage to England first. Nettie is starting Phyllis on "Europe" books and I will start a "Trip File" that covers the places & people we may want to see. It would be better to go the way I routed for England is going in June & July & Italy & Italy in August. I look forward to a few days at Cape & also seeing Peter Howards Farm in Norfolk. I know if we want to park Phyllis with Betty L. at any time

For a few days we could
do so. Always wanting to
more than pay our own
way, there is much that
can be done for us.

I love the thought of the South
of England Wells-Winchester
& the end of Somerset with James
and his family. Lord how I
love to think of the Rhone Valley

We must make our stern
resolve. Let us be selfish. It is such
a temptation to go somewhere to show
some one else something and I
am sure if we remember we have
limited time and Phyllis all
the time there is; she will be as
happy & get something will stay
all her life. While we will
line up many "possibles" we will
do what we want when we want
— Eleven o'clock — & with happy thoughts
of you and lovely music I will
ring off. I suppose you will get
this Monday morning. If I

Continue as comfortable & lazy going
as now I think I will not consider
pulling out till after 24th. God bless
J.
