

July 17<sup>th</sup> Saturday Keyway  
13<sup>20</sup> ~~0000~~ Valley.

Dearest One

no news of the youngsters  
arrival so I suppose you are all  
sitting around + Robbie is still  
wondering which it will be + you  
are basking in Texas sunshine unless  
the north is bothering you mildly.

Well this was K's month Annie  
+ I left there happy + took LHI to the  
Explorers club. dinner.

Louise Thomas presided. They got started  
late + I left before the last talk was over.

1<sup>st</sup> a nuclear prof - a humorishful  
humor into nuclear physics + told  
us of the study of cosmic rays. +  
the mesotron which only has a  
millionth of a second etc etc.

Then Geo Kenny Col of air force  
just back from a trip around the  
world talked with statistics + a sense  
of grim reality. From intimate contact  
with Russian officers he stressed their  
one party idea - kill off leaders of any  
opposition + from it deduced that  
only balance of forces knowing we  
are stronger but have no intention of  
using strength except in defence is  
only way to have peace. Told of our  
defence plans + that we must

Russian ideology in  
Communism

be ready to be in the air  
in a few hours to meet  
attacks simultaneously by atomic  
bombs on N.Y. Washington Chicago  
Detroit + San Francisco across  
the ice arctic our only safe guard.

Must be prepared on radar  
alarm to get attacking planes +  
then reciprocate.

An antarctic explorer said  
exploration had gone forward  
almost in logarithmic progression  
eg. of advances in 10,000 years the  
last 1000 had done more than  
the other 9000 + of the last  
1000 the last 100 had done  
as much as the rest + of the  
last 100 the last 10 had done  
as much as the other ninety + the  
last 10 had seen nearly as  
much in the last year.

I think they have certainly  
learned a lot about polar conditions  
in the last year.

Matt Hanson the colored  
man with Peary was there  
+ "Toke a bow" + Antony Fiala

+ Stefansson + Sir Hubert <sup>Wiersma</sup> the  
 submarine explorer + John Keirney  
 We sat at table with the famous  
 lecturer Burton Holmes + Solothwaite  
 yarned on Tegamini with the  
 Engineer etc. but as I came  
 out I heard the band for  
 dancing playing "I can't give  
 you anything but love" + said I would  
 rather be dancing with you  
 than go to all the Explorer Clubs

Then I to Westport on the 10<sup>th</sup>  
 Sandy cooked us a nice lunch, the  
 house seemed in good order + the  
 sheep circulating a bit. I called  
 on the Heales + they are going  
 to took at the Copeland house  
 tomorrow. There was a great day  
 + I promised to call in rent + outside  
 work to get other in shape. They  
 are very nice. There I went to see  
 the Healy, Mrs Hutchinson the U. in  
 law had brought the Fox Moore house  
 which was a wreck + remodelled  
 it most delightfully. She is from  
 Haverd Mass has a sister an  
 architect + told me used Pungah  
 on her house.
