

Monday P.M.

Dearest One

I have yr letter of Friday
nite when you were feeling fierce again
and you describe the baby etc.
and I am glad that you feel I was
calm + helpful. I could help you
a lot more dear if you would
only have more faith in me.

That doesnt mean I dont want your
advice criticisms and suggestions for I
do + need them, but many things
that seem whirling around to
you are clear to me + part of
a purpose that is going steadily
forward but obviously has to be
modified by change in personal
and in world conditions.

There has never been more flux
in the world than now + we have
to steer our boat to meet currents

While our Russian friends loom
on the horizon today if you jump
back to June or July '40 you should
have bet 3:1 that within 6 mos.
Hitler would have ruled the world
+ yet today we nearly forget

him. Our greatest danger today is the selfish people farmer + labor leaders who want to boost prices and costs without regard to those with no change in income, and I think the unrealistic like Adeline Baker who are against universal military training entirely, forgetting their mistakes before the war.

Will like my M.R.A. friends I cannot criticise but must look out for what I do + say to help what I believe in.

French devaluation again Poles all to get Soviet youth training makes me feel that unless our 140 million "US" put the world on fire against our selfishness

Neave will prove right. I can give money but I am too selfish to give time for M.R.A. P.S. I did not see the letter of the lad or Dove Cote but would be very sorry to see him there. Rodi Norali writes you costs of heat etc much higher + wants sent Cent. Requests of course.

I could write on. S.H. comes up tonite. I told him of the contract.

He liked the girls in red but the one in white has too much under-
was filly & the wear looked
like a satyr. I am afraid
he needs education.

You need patience & to
know that many see things
look differently. Enough your people
liked it and will push it.

The most interesting thing to me
is that if they make something
out of it directly or indirectly
they are likely to want you to
do some more and I am sure
what you could do will
greatly surpass that & give
you that sense of contributing.

The Kaltenbore party was good.
Hans made a speech & his son who is
running for Congress in Palm Beach
as a Republican & thought he had some
chance made a good one.

I met Elis. Ryan the tennis
player & some pleasant people.

They had many radio people
of course.

Coming back there dearest
please, please, feel that we
are each working out for
our salvation & together it
will be a joint salvation.
Each helps the world in his
her own way.

I feel that Miss O.B. is
a great help & can be more
naunnie goes to see her
mother for a few weeks perhaps
longer. Altho her brother & family
are there I guess her mother needs
her also. S.H. & I work over some
fundamentals tonight and I
am starting Dug B on serving me.
Pls hold for the present that
part of my "service" comes from here
for the comfort of working from home
is very great. and by shutting two
doors i.e. to the main hall & yr
room I have a 2 room library &
headquarters where I can write. 26th
the Lord allows when I feel things come
I shall try to reach that a call.
