Hello.

God bless you

Am sitting & feeling a million dollars & am kicking up my heels in Rebellion against my god blessed brother. He wants me to say to the boys I won't or else do something or myement stock for them. They go to bed with their bellyaches & tell me the lectures the committee on legal matters as if they were Kindergartners. Well I shall take Gods guidance but I am tempted to supplement HIS by another lawyers. Old Ted was right when he said I was an obstinate man.

They are all together except John Miller (Morris Davidson died) his uncle Mrs Davidson lived with my grandmother one-not that way- on a farm I mean

One lady Trustee said you were such a lovely picture here. - all sat about you with affection & admiration

My rains beautifully I do love Bob C. Such luck & judgement Mrs Moxon is on board again you remember her she had bought a farm near Reading Pa. Henry Parker & wife dau in law. John Raven isn't down. Clothier worked all Summer as chairman of the Constitutional Convention so they are going to Calif to contact Rutgers men. I've voted them 4 months

vacation if they would take it, which I hope they will. They have a relief map of the whole area across the river with the new chem building and the faculty houses & sewage plant. It is a grand conception.

The Powers who drove us up last year asked about you. I don't seem to remember the new little one + my sweet wife. I also was there don't you remember me. Sure I do but I babble over like the jackassy kid I am.

It was too late to call you last nite but I shall try tonite or Sunday Gen. I can see each day unfolding new discoveries + Barby strengthening + Mayo owning a large part of the Earths fullness + Robbie taking more of the world's burdens which means printing on him. I cannot imagine his being jealous of his sister because she will be HIS sister + his responsibility — just another patient +

I sent old Doc Roberts down yesterday Gen. to the office filled with ideas, hoping he would play for me & I added around whom I could pick up a major research + consulting business. All I ask if one other doc that will start by lighting up. I know its my fault but I think of "Headpan Row." as I tell something that ought to interest a carp.

G.H. was right that the moral
value of my putting myself
even with them without using
the whip in reserve would
have been very great. Perhaps
the old jerkas is wise. I dare
say after all. Somehow there
are times I vowed for myself
