I am more than happy to hear of Bet & the joy of getting really letters.

I have read a lot of Peter Howard's Building a new breed lately The last item was a speech by our friend Buchman, which told of the young Swiss engineer you met at Caux who was so intense & consecrated He died you know & his wife told Buchman that he had constantly with him the prayer of St Francis of Assisi that you love. Reads the book and as I read it I feel a new meaning in life. I had been thinking at night as I occasionally do of the things I had tried to do for people & my apparent failure to really give for if I had really given I would have had a response. Dell & Burnside & I really know that if some one does not seem appreciative it is not my responsibility except to find out how I have failed.
