

Stuttgart, June 29th, 56.

Dear Dr. Darr,

you are feeling well! - and
out of the Hospital! Thank
you so much for those
wonderful news in your
letter. And thank you
also that you would help
self with that Affidavit for
Ernst's friend, Heinrich
Menzel.

It is really bad of me
not to have told you
more by now, but it
musst be the horrible
weather here. Gray and
cold and rain. The major
worry of poeple here is

1) the radium - activity of the rain here, which is getting worse every month.

The scientists say that right now it has reached the point of getting real dangerous in south-germany. Of course I think they will find a way to "tame" that all, just like they did with "lightenings" which used to burn up houses.

Ernst ~~is~~ very definitely wants to go to America to live. He has been in Frankfurt again on Monday full of hope. - Again he has been turned down by the American

2.) Consulate, - with the same answer as always before: "Come again next November." Of course he will do that and never give up. But he feels very badly every time he can not leave Germany, especially now.

Yesterday I bought my Mother something: a beautiful new Iron! It will make ironing so much easier for her, as she had one that felt as if it was from the last century. She is very happy and looks well, but her hair is all white. My father also looks well, but my brother breaks somehow

3.) my heart. He is so alone
and shy and has none
of the joys I have. - But
nor have my parents.
I don't see why I am so
blessed to be in U.S.A.,
and can breathe this
wonderful air there, and
have you and Nell and
so much..., I don't know
a thing.

You have always said
that one does not know
how one feels about
some things in the future. -
- Oh, this is so complicated
what I wish to say...,
I will tell you when I
come back in August. -
Take well care of yourself,
and have my best thoughts,
always your Rose.
