

Well - there is nothing I can say, I simply receive - with my soul wide open, like a child, what you have said.

It is so much more and greater, than a human being could know - except to receive it through direct communication from the eternal source.

This is your source. - And through you, it comes to me. I feel such sudden exultance, and am startled that such simplicity - could answer everything that seemed impossible to be answered. You perform the strange miracle, - of silencing that part of me - which keeps me from knowing and tears me apart and to pieces. Then all that remains is the part that is quiet and patient, and can know and listen. Since days and months - I have questioned - and questioned, - and it is as if I called all the Archangels and they listened as I accused. Now they also are there, looking at me, - but

1) now I have the answer. Strangely, it is as if there never was a question. But as if they are challenging me: You do know: but will you be able to have enough Faith? Will you fall again? - You have all the power - the whole Universe is yours - but only if you can keep - what you have received now. — This is what is important. I must be able. All it needs is to stop that self-satisfaction - of claiming to have achieved anything with ones own will. — Frequently the idea in me came up - that once I did something. I did go to America. - Yes. But what would have been: had by the grace of God - I not met you? Something I never planned or dreamed of! It just happened! This was the wonderful thing, - not what I did.

So we know that something good will come. The greatest thing is - as you say - that the pictures come. The rest is of no help, except the quiet and peace.

2. You have send us such a big check!!
Nobody could conceive possibly - how
this is possible. Only Thomas will
know - that there is you.

We will get something which you
would approve of - and something
we can put into a suitcase when we
come home: A "British Officers Chair".
It is made of wood and Canvas, and
completely to take apart. In a minute
it is put together, and looks very
dignified and comfortable and
simple. (But it is not just primitive -
stubborn!) It is the most wonderful
Chair, I always wanted one, and
Henry too is crazy about them.
(The British Officers used to carry those
in their outfits during last war.)
It will replace one of our chairs,
- which really is a "thorn" in my
eye - as it looks like a Dentists
Waitingroom-chair. -

This we will get for Christmas
in Frankfurt, where we know a
place that carries them. I will
take a Foto of it when we have

3. it! And for Dramas we will also get something beautiful. So you see - we are getting "spoiled" this Christmas. Our "Dream Cray". Ah! - it is all your fault... (I can hardly wait!)

I started to make you something small - but it did not get finished quite, although I began in October, but then I found no time - or peace to continue. Anyway - soon it will be finished. So I've send a tiny parcel with something to give you strength meanwhile.

The new Apt. is quite adorable. Very light and more room. We painted the walls white, and there are enormous windows and Balconys. From one side we overlook the Rhine and the Nibelungen-bridge, from the other the huge romanesque Cathedral. By now everything is about settled and cosy - since yesterday I started to paint - at least set up the easel. Dramas is since two weeks

4. in Göttingen at Henry's Mother, but is coming to us next week again. He is getting two more teeth, - that makes ten !! He also is much firmer in his back, although he still cannot sit or stand. But it has time, and will come.

I got a nice letter from Prof. Dr. Teyser in Stuttgart; he will be able to see me the end or middle of January about to talk of a photographic Exhibit of you. He just had no chance before. At Belzer Publishers I got some good information, although they decided not to publish your Book, because they are since 2 years specialising in Color; but Dr. Trauts was very positive. He said that they are advertising even is all in gear for they color-productions right now. Otherwise, he thinks that "black and white" Publishers would get a "jewell" with this book into they hands. Did not think it should be difficult, and gave me several more Publishers add.

5. one also in Stuttg. (Artemis, who is also in Zurich) and whom I am going to see middle of January - that is, after I have seen Teger. Anyway, I was not at all disappointed at Belzer, on the contrary. I Am more encouraged then before. Naturally, to you it does not mean anything if people ignore your work or rail it. In fact all you wish is to be in the solitude of just receiving and giving what from there comes to you. But ^{what} you find there - is exactly what all people of our time are lacking, and should draw from. - (Half of all are sick from not having it.) It just depends, if people still can sense what they are sick from, then they will grasp for your work as for the last straw. At least, I think they should have the opportunity - to possibly become healed by your work. - A huge world-photography-exhibit was just now staged in Frankfurt. You

6. I can believe me, it was dreadful. All that garbage. I saw only one part and left. What right, and what nerve have these people to show such filth and nothingness, when there is so much beauty. If the majority of people commits the crime of only registering this of the world (which is the work of God, - and he said that it is good) then the sin is big enough on the peoples part - to deserve to be blown up by an atomic bomb. Your work just would be such a big, new and real influence - which we need so badly. It is for this reason, that I feel it should be seen every-where. Confirmation it most certainly does not need from any source. It is Confirmation itself. Dearest Nell - we will think of each other, make your beautiful Tree, for all of us. I can see it - feel its warmth - and will see nothing else on Christmas eve. We will be there together. All my love -
always - your Rose.
