

With is happy with his course. However
he finds returning to the American
student would difficult when he is so
near becoming a professor. It is strangely
degrading to be a student in this
country, at 27 years.
My ventures into domesticity are
complete Felicity! Cooking appeals to
me the most. I have thought often
and I think that not being fastidious
helps! we are very happy. But lonely for
you - I will write soon again
and best to
"pater" and "m

!Thank you for the TELEGRAM! October 18, 1960

Our dear Nen -

The bread is in the oven and its
fragrance baking fills the little cottage.
Such joy, gastronomic and domestic, comes
from baking bread!

We are bursting with another,
greater joy which excites me to tell
you! You must know before my
words!.. We are pregnant, expecting
a baby at the end of May. I already
feel heavy and important - with

a delicious roundness there! My happiness knows no words.

Once again our love is made more perfect by your presence. After our evening making pictures in Buen Retiro we were together by the fire. It is from that night and its sublime love that I bear a child, a blessing of great goodness and deep beauty has been bestowed upon this child for inseparable is this weight from our sweet memory.

Some photographs are here enclosed, to give you an introduction to our little house. We wish you were going to actually see it. Until then we shall send small glimpses.

We have borrowed some equipment for the darkroom, and, except for fixing light leaks, we are ready. I will send you my first "good" results, (not yet quite knowing what this means— but you shall be my master even though I am faraway.)
