

HEAD OF HYGEIA (Scopas style)

April 18

Dear, dear Nell.

We have just returned from a delicious journey through the Greek Islands - torching Istanbul. Awestruck by the sublime and intellectual beauty of the ancients, I am plunged into much reading once again.. At the sight of a greek temple, one feels that civilization once had reason to create beauty and refine it. today we have refined too much in contest.

How we think of you! We want to see you in August - in the "sacred precinct" where we must consult our "oracle" The Goddess, Nell. Love, Margaret & Mitch
