

of the paper - easily done in a second printing, when we will use a better printer and the paper which was my choice. (Everyone now agrees). It really is going to be fine.

My problems are not so easily solved because the centerpiece of house + roots somewhat depends on the future of the Press. If we don't raise enough money to support us we will have to sell out or something. Both of us do dream of moving more country.. but that means in the East. The dream is of a printing, craftsmen community - teaching photography, schools nearby and that green landscape behind. The idea of such a place near you, with your hand in the Tone of the activity would be marvelous.

Of course staying here is OK - but not exactly as we are now. I am very over-worked and I must give up help - and have a smaller house - simpler setting. Urban life seems to give one false standards - There is almost too much going on. We want to put work + home nearer - so that there is not such stress in the environment.

So, dear dear friend, dearest in the world, place your heart at rest. On times a hand - we have had troubles, we are trying to resolve them. The book is fine. We love it too.

We love you too - always, Greta
