Wishing Well GREETINGS

MADE IN U.S.A.

you could check at the Station - I guess it's Grand Central. We are beginning to get really excited, & it certainly won't be long now.

We haven't had any word from Bob since we saw him Sunday - we will probably get a letter tomorrow. At least I surely hope so. His letters are never lengthy but they are all so important.

All news about Bill sounds so wonderful. It's so good to think of her feeling like herself again. Surely all the new equipment she has may solve many problems & give her a chance to build up her strength completely - I know it will.

There is no need in mentioning weather - one just accepts it.
