

January 14, 1955

Dr. Grover C. Dillman, President
Michigan College of Mining and Technology
Houghton, Michigan

My dear Dr. Dillman:

I am not sure if such a book as "Mother and Child" by my wife is a proper constituent of the library of the Michigan School of Mines. Nevertheless, it gives me much pleasure to present it, feeling that if it does not belong there, I can trust you to abstract it and keep it for your own use. It tells of spiritual things but I think there are times when engineers or their wives might find it a relief from the pressure of concrete facts. It will come under separate cover and I am sending with it a small brochure describing it and also a clipping from the County Fair of Fairfield County, telling of the author.

Besides this, I am enclosing data on another project of The Dorr Foundation which I am sure will appeal to the practical man. If you find any authorities at Michigan who would like to have this matter of highway safety as we see it put before them from time to time, I should be glad to put such a name on our list.

It has been interesting to me to see the reaction to this proposition which, like everything else in the world, is very old. You, I know, will be interested in the merger of the Dorr Company with Oliver United Filters. It is an interesting experiment in human engineering which I believe will work out most satisfactorily.

With kindest regards,

Sincerely,

John V. N. Dorr
