Dear Mrs Dorr.

Thank you very much for your lovely Book of "Mother & Child Pictures". I love the impressions of mystery & the Ideals you voice. I think both Photographers & Painters are striving to get further away from the meticulous detail of the literal presentation of things as they are seen, & find a deeper significance behind them, or rather through them. After all it is

the surface aspect that leads us on, or is'nt it the Living Spirit within that calls unto Spirit?

Pioneers all thro the ages & now more than ever are using every talent to reveal inner meanings. & all things are "working together for good"

Those who expose man's cruelty lighten our darkness of Ignorance to the Sacred Mystery of Life & its Law of Constructive Beauty versus distruction

Again thanking you for adding to the Universal Language with which I hope to be a humble user. & for sending me your beautiful Book.

Yours Sincerely

Agnes B Lowry
