November 6, 1957

Mrs. Francis Peterson
Texaco Research Center
Beacon, New York

My dear Mrs, Peterson:

It was a great pleasure to meet you and to meet your husband. I am indeed interested in the studying that you are doing and hope there may be an opportunity for you both to come in contact with us - either in New York some time, or else over at our country home in Washington, Connecticut.

I know that you and Mrs. Dorr would have a great deal in common and I am more than happy therefore to send you a copy of her book "Mother and Child" which was brought out by The Dorr Foundation.

You will appreciate that the messages therein are directed to those across the seas to whom a large amount of the books have been sent.

I want to say also how much I appreciated meeting the Texaco crowd and how greatly I was impressed with the public relations - internal and external that seemed to exist in the organization.

With kindest regards to your husband and yourself, in which Mrs. Dorr would join me was she here,

Sincerely,

John V. N. Dorr
