Mr. James Robins,
Director of Research,
Drexel Institute,
32nd & Chestnut Sts.,
Philadelphia, Pa.

Dear Mr. Robins:

I am sending you under separate cover copy of "Mother and Child" that I promised, which speaks for itself.

I am looking forward to your story regarding Kaiser and his introduction to Dorr equipment which you told so well and which interested me so greatly. My recollection of it is already a little bit mixed, but I recall vividly what you said about the Dorr engineer going out from Denver and also about Kaiser himself going to our laboratory at Westport, Conn. and accepting happily our attitude toward facts.

With kindest regards,

Sincerely,

John V. N. Dorr.
