AIRMAIL July 19, 1955

Mr. William E. Rudolph
Chuquicamata, Chile

Dear Bill:

Kaar showed me your letter of June 24 and I was indeed glad to hear from you.

I am sending you under separate cover a book, "Mother and Child," which my wife has brought out and is now being handled by The Dorr Foundation, a charitable organization with which I am connected. I am also enclosing some data regarding Mrs. Dorr which I think will interest you. If you care to send me a check for $4.50 for the Foundation, do so, but if not please accept the book with my warmest compliments. The U. S. Information Agency has taken 150 copies of the book for distribution. If you come in contact with it at all in Chile, I would appreciate greatly any comments as to the work that they do. They are a branch of the State Department.

I note that your son Bill is specializing in electronics and is in Paris. I heard recently of a friend planning to set up a correspondence school primarily for South America to teach the subject of electronics in Spanish. Would you think that such a project, if handled honestly and with high technical advice at the top, could be made profitable?

I am also enclosing some data on the White Line, a project which the same Dorr Foundation backed and which has proven a very distinct factor for both safety and comfort.

Kindest regards,

Sincerely,

John V. N. Dorr

Enclosures: (D. F. Memo #3 with NYT reprint of 1-5-55 and #4)
