March 2, 1955

Mr. R. Gordon Walker
36 West 44th Street
New York, New York

Dear "Brick":

Re yours of February 24 which was much appreciated by Mrs. Dorr and myself.

The exhibit in New York at present at the Museum of Modern Art is called "The Family of Man" by Col. Steichen. He stated that he had examined many thousands of photographs from all over the world and selected, I think, 400 of which four are by Mrs. Dorr.

You will also be interested in knowing that the United States Information Agency have asked for a number of her books to distribute to their stations all over the world. While I know you do not need it, I think you may be interested in the enclosed comments on the book.

I am glad you got the Dorr-Oliver Worldwide and I assume that you also got the Christmas and final issue of Dorrco Doings which we sent to all the Oliver people as well as the Dorr people.

I came back with a bug which I picked up in Florida and am now staying home with what the doctor calls congestion of the lung. He said although it seemed very nominal, I should sit tight with it and stay home for the week.

I hope we can see each other when I get around again. My best to your wife.

Sincerely,

John V. N. Dorr
