January 6, 1961

Mr.Edgar I.Williams,
101 Park Avenue,
New York 17, N. Y.

Dear Mr. Williams:

I do not know what you may think of me in connection with the man that was to go to see you and discuss "Synthanite." One thing and another interrupted it and I got thrown completely out of kilter. I have asked Mr. John Jaros, who is a contractor, and considered very much of a flooring expert, to call on you and ask the privilege of explaining it further. He is a man who has apparently been connected with flooring for twenty years at least and I believe he is entirely reliable and has a strong sense of not committing himself in any way that would injure his reputation with architects or owners. He went over to England in cooperation with the American Synthanite Corporation to study the actual use of "Synthanite" both there and in Germany.

I am treasuring your map of your home in New Milford and hope when there is less snow on the horizon we may have the chance to get together again.

We visited the recent show of primitives at the Club and found that an old friend of ours had been connected with the collection. It has been a fad of my wife's and she has a small collection at Washington.

Incidentally, I am sending you under separate cover one of her books that tells its own story.

Sincerely,

JVND EFG
