Dear Dr. Porter:

Mrs. Bailar and I have an interest in fine photographs. We have enjoyed each of the Sierra Club books which include your photography.

I am writing to inquire about the possibility of buying a color print of one or two of your photographs. In the pursuit of permanence we are interested only in dye transfer prints.

I have attached a list of photographs which we find particularly attractive in the Sierra Club books. I would appreciate knowing whether any of these might be available in a dye transfer and if so can you advise me of the size and price. In the event that none of these are available, they may give you some indication of our preference so that you might advise us of what other works are available that might be of interest to us.

Sincerely,

Benjamin F. Bailar
