15 Ontario St.
Guelph Ont.

January 14 / 74.

Dear Dr. Porter,

At present I'm a second year university student taking honors physical sciences at Guelph. I admire your work very much and was wondering if I could possibly work with you during the summer, either for pay or voluntarily.

I am beginning to question the validity of continuing my university education. I have always been interested in photography and get excited about the possibilities of learning as much as I can and receiving some guidance.

I use mainly kodachrome and would be more than willing to show you my work, if you'd like.

Perhaps I should say that I'm interested in conservation and have travelled throughout Canada by hitch-hiking, cycling and canoe tripping.

I'd be more than willing to send you any references or talk to you in person. I'm looking forward to hearing from you.

Yours Truly,

Charles Jackett.
