Dear Mr. Line:

I appreciate very much your thoughtfulness in sending me a personal copy of the last "Audubon" containing the story about PATTERNS. Nowadays such gestures are rare, and "half the time" people won't even answer letters anymore!

I think Eliot Parter's falls scene on page 35 is about the most beautiful thing I have ever seen. Perhaps this is partly because it features "Moosewood" which is my woods name given because I have taught several thousand campers over a 40 yr. period how to make and play moosewood whistles!

Sincerely  
Edw. M. Harlow  
Moosewood
