

Mr. Porter,

I have been enjoying your photographs for the Sierra Club. They are most enjoyable.

Do you feel that color photography and black and white photography are similar in its creative process, or do you feel the intensity is cleaner in one than the other. I would love to know your opinion. Also if you have any reproductions of your work, can you please sign them and send them along. I have enclosed a stamped self addressed envelop for your convenience.

Sincerely,
David Schulson
