

Poll 1 Tortugas clouds from plane and

Poll 2 Tortugas riverside vegetation

Early life in Illinois

became interested in birds

rode bicycle to Shokri mounds

where many birds were plentiful

collected birds eggs

The Shokri was the West to me

But there was change in affluence
with New England N. H. and later
Maine

Began to go to Maine Coast at 13

Photography of birds then became
a growing interest

The West still held a strong attraction

was taken on camping trips to
Canadian Rockies & Grand Canyon

During school and college years
continued to photograph mostly
birds as a hobby.

→ But during ~~medical~~ medical school
and subsequent period of medical
research photography was neglected
until about 1935 when my
interest revived.

Met strongly a severe critic
but was encouraging

Eventually he exhibited my
photographs in 1939. Gave up
research for photography.

→ During college 1922 went west
in Model T Ford

after graduation 1924 went on
pupils
