

September 21

Dear Eliot:

I have just gotten a photographic book that I like quite well- Portrait of a Period ,A Collection of Notman Photographs 1856-1915 . It is published by McGill University, Montreal. The reproductions are really very good.

We are having a phenomona of squirrels being run over on the highways. It seems that there is insufficient food and they are scurrying from the mountain areas into the piedmont. Those interested in helping the squirrels are asked to supply regular amounts of scratch corn throughout the county for the duration of the winter. Those most concerned are the hunters. I don't think it is possible to take care of the squirrel population and they will partially disapear for several years but will come back eventually. It is a forcast of what will happen to human beings with overpopulation.

Audrey and I are going out to Utah for about 10 days. I know you don't care very much for the Knees but we like Alice and I like the country there. I understand that Utah is Wallace country. Someone asked me who I was going to vote for and I said I didn't like any of the Candidates but that I felt Wallace would be a catastrophy with the RED NECKS in control

Are you coming back to this country for fall pictures?

Affectionately,

Sawack
