

# National Wildlife Federation

presents this certificate to

DR. ELIOT F. PORTER

## Patron of Conservation

Many of the resources which made America great are in danger. Our forests...our green and growing woodland flowers...our native animal life...our pure water...even our fresh, clean air—are being crowded aside, used up or contaminated in Man's march of progress.

Because you saw these things were so, you have enlisted in the cause of conservation, supporting the National Wildlife Federation in its program of restoring, protecting and conserving our natural and wildlife resources.

This certificate is presented in grateful appreciation of your part in helping to further this program.
