Fort Worth, TX 76107

Dear Stuart:

I very much enjoyed meeting you at Lee and Ramona's premiere of our new documentary and greatly appreciated your interest and enthusiasm.

Cindy and I greatly appreciate your offer of assistance. I am enclosing a member application for Bat Conservation International, and Cindy also will be in touch to follow up on your conversation with her. It would be a real honor to have you join us. Saving bats and the habitats and economies that depend on them is a real challenge. Nevertheless, as you saw from the documentary, we are making a great deal of progress. We work very hard at BCI, but it's only through partnerships with special people like you that we will succeed.

Cindy says you would like to observe one of the famous Bracken Cave bat flights. The evening emergence of 20 to 40 million free-tailed bats is one of the most spectacular sights in nature. We'd be happy to share it with you one evening.

The best emergences are in late July and in August, but very impressive flights can be seen even now or as late as the end of October.

We look forward to hearing from you.

Best wishes,

Merlin D. Tuttle
