

23 June 2001

Mr. Paul Lamb
618 Lavaca Street, Room 9
Austin, Texas 78701

Dear Sir:

Thank you for our letter. I was under the impression, a mistaken one it seems, that Mr. Nowlin wanted his observatory murals completed before the house is dedicated next December 21st.

As far as painting the murals in fresco technique is concerned, it is a prospect that I do not greet with enthusiasm and you need to think about frescos carefully if you have problems with wall moisture when there is no air-conditioning.

I would much rather do large framed maya jungle painings in the tradition of Catherwood in other parts of the house as both you and Mr. Nowlin suggested.

Since everything is up in the air, I will simply wait to hear from you, that is if you should still be interested in doing something. Continued good luck with your project.

Sincerely,

Stuart Genlitz
