

Dear Craig -

I talked to David Holman last night, and he told me that he had talked to you about the book project. He was very pleased with your indication of ^{enthusiasm} your interest.

Though I have not heard from you yet, I am still nevertheless enclosing ^a check for \$25.00 so that you can acquire the materials and make a demonstration box for me. I am currently preparing a brochure for the promotion of the book project, and this brochure ~~should~~ will contain a photo showing the interior of a library with one of the bird prints framed and hung on the wall and one of your boxes on a table below the print. You have told me that the first demonstration box would take you about twenty hours to make and that you charged \$40.00 an hour. I am enclosing \$25.00 ~~more for~~

would cost me about \$200.00. I am enclosing \$25.00 extra for any additional expenses which you might incur. I know that as we get nearer ~~and~~ to the Christmas ~~year~~ time will you will be more busy, but if you could get this demonstration box done as soon as

possible, it would be a big help to me. ~~Then~~

I am enclosing some of our prints in a tube for you to get the proper measurements. The height of ^{the} ~~all~~ the prints and text will be $2\frac{1}{2}$ " ^{together}. This height of $2\frac{1}{2}$ " will leave about $\frac{1}{4}$ " leeway on top for a small pocket that will contain a smaller version of the text for easier reading. The box as we discussed will contain two groups of text and prints each, as you suggested, enclosed in its separate "chemise" tied by a ribbon. There are going to be 80 ~~pages~~ in the lower ^{chemise} section and 40 pages in the upper chemise. 100 pages measures exactly 1.75" so that you can determine thickness of each section. It is not really important that the measurements all be exact for the demonstration model. It ~~should~~ should be close enough so that people can get a good idea of what the box will look like. ~~As for~~

As for the cloth covering a standard beige covering might be sufficient, but if you have any ideas concerning this, please feel free to suggest them. My telephone number is 1-817-738-4427, and I am ~~best~~ easiest to reach in the early morning, from 6 AM to 10 AM and in the evening.
