

Note on Wind + fire

Feb 15, 1993

Just as a human blows upon
the sparked tinder in order to kindle
the fire, so does Quetzalcoatl Ehecatl
in replication blow the sun into full
heat and light. This relates the temples
of Tonatiuh and Xicotekuhli and may
indicate the need for a Wind Temple
in both places — Rational for the location &
identification of the temple of Yocaticuhli
in the north west near Tzomolco. (over)

N
fire

Sun

yacatecutli

xipe

There might be a birth-renewal theme
in Yacatecutli's Temple to match that of
Xipe Totec - look for this
