

STUART W. GENTLING

(1)

The width of the stairs
is determined by the primary rule
applied from the bottom as at B

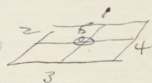

(8b)

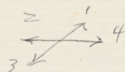

which also lays off the alfordas

Symbolism of numbers very powerful in this scheme

N^o 5 = Center of power controlling surface plane

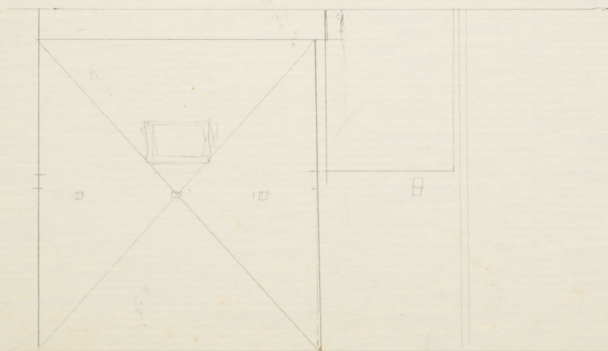

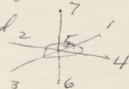

N^o 4 = The four directions

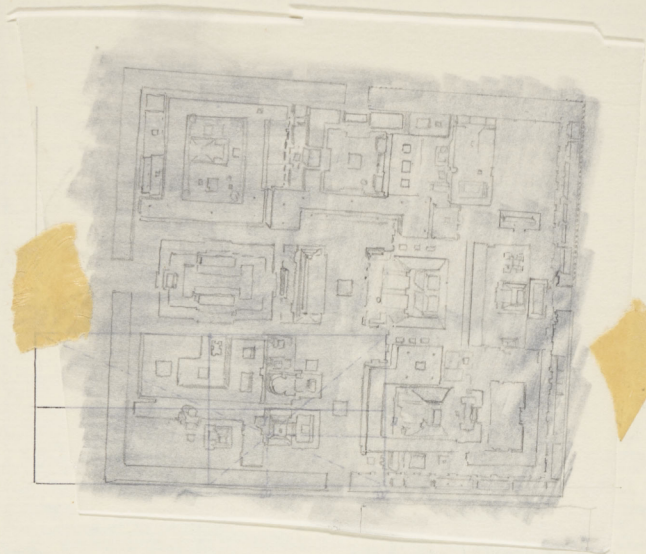

N^o 9 = another way of stating power from the center
over a plane; make up of the four cardinal directions
the four directional quadrants and the center

N^o 7 totality of directional forces consisting of the four directions plus the
axis from the center, the lower world and the upper world
