

June 14, 1982

Dear Scott + Stuart,

We did make it to the gathering at Dr. Lilly's house at the end of June. It turned out to be a fund-raiser for the dolphin project + spa at Costa Careyes. There were lots of people, the famous + the rich, eccentrics, movie stars, lawyers, etc. - Everyone went home with a blue folder containing a summary of the project, a budget and a pledge card - \$250.00, \$500.00, \$1000.00, \$10,000.00 + other. Timothy Leary's wife kept talking about they're making a "my Dinner with André" type film of Leary + Gordon Liddy. She said if we wanted to meet Liddy she could produce him in a flash. We declined politely. Still, all in all, it was an interesting experience. And we connected with several people who had heard of our work and who may be of help.

We are now finishing the story board with material that was only available here - Clips from the Hiroshima films for example - Once we have everything together we will begin to see people -

Remember Maria de los Angeles?

She is here too - in fact we are all staying in a tiny room - She is

buying some equipment + catching up on the new movies - We have seen ET, Tron + Blade Runner -

ET. was the nicest although a little boring in the 1st 1/2 - The others are all fantastic special effects but not story - I can't wait to hear John's father reaction to TRON -

What are your plans this summer? Are you thinking of going anywhere? Let us know so we can coordinate as we definitely want to come see you but our plans are a little vague at this point.

Love,

Colz 11/2
