

?

12 $\frac{1}{4}$ "

16 $\frac{1}{4}$ "

Ron, include all the base image shown here,
and let the height of the sky fit proportionately.
This photo is not exactly the same proportions as
the 16 $\frac{1}{4}$ " x 12 $\frac{1}{4}$ " print that I want.
* I want the sky area left white paper color!
